

PATIO DOORS

Oversized Doors, A-Series, 400 Series, 200 Series & 100 Series

**ENHANCE YOUR VIEW
IN A BEAUTIFUL WAY.**

CHOOSE ANDERSEN® AND NOTHING LESS

For over 115 years, Andersen has been designing and building windows and patio doors that are among the best performing in the industry — and a favorite among builders and homeowners alike. With a wide selection of grilles, hardware, exterior colors and interior wood species, Andersen makes it easy to match and enhance your home's style, or create a custom look. So whether you're replacing or remodeling, look to Andersen, rated #1 in quality and performance* and the window and door brand most contractors have in their homes.**

FIND THE ANDERSEN® PATIO DOOR THAT'S RIGHT FOR YOU

Available with options that are ENERGY STAR® certified throughout the U.S. and backed by our renowned Owner-2-Owner® limited warranty, Andersen is committed to providing you with long-lasting,† energy-efficient products.

Not only are Andersen patio doors among the best performing, most energy efficient and weathertight available, there is an option for every style and budget.

A-SERIES

Architectural style plus superior performance.

400 SERIES

Time-tested, classic wood craftsmanship.

200 SERIES

The beauty of wood with a contemporary style.

100 SERIES

The smart alternative to vinyl.

OVERSIZED DOORS

Bring the outdoors in.

WHY CHOOSE ANDERSEN® GLIDING PATIO DOORS?

Gliding patio doors are ideal for any climate or any room. Unlike hinged patio doors, they fit into tighter spaces because they have at least one operating panel that glides horizontally so it does not interfere with your room or patio. Whether you want a traditional or contemporary look, Andersen offers a full portfolio of space-saving, weathertight gliding patio doors.

Unique Locking System for Peace of Mind

For weather protection and improved security, our **reach-out locking system** pulls the door tightly against the jamb.

An optional **auxiliary foot lock** provides an extra measure of security when the door is in a locked position. Available finishes coordinate with our patio door hardware.

Weathertight Performance Interlock weatherstripping

is designed to seal out drafts, wind and water.

For an exact fit
for your project.

Smooth, Long- Lasting* Operation

Our gliding patio doors have panels that move on **adjustable ball-bearing rollers** and a **durable stainless steel-capped track**. The result is long-lasting*, smooth, effortless operation.

Premium Hardware

Match the style of your home décor with our **wide selection of hardware styles and finishes** — more than you'll find with just about any other manufacturer. An optional **exterior keyed lock** can also be added to your hardware selection.

Consider Expanding Your View

Add a stationary panel to enhance your view.

DID YOU KNOW?

If you currently have a gliding patio door with sidelights and/or transom windows, you can replace that with a larger gliding patio door to give you more glass & light.

A-SERIES FRENCHWOOD® GLIDING

OUR PREMIUM GLIDING PATIO DOOR OFFERING AUTHENTIC ARCHITECTURAL STYLE AND SUPERIOR PERFORMANCE.

- Taller bottom profiles provide the authentic craftsmanship of French doors
- Made of solid wood and fiberglass for superior strength, stability and long-term beauty

WHY CHOOSE ANDERSEN® HINGED PATIO DOORS?

Designed to open into a room or out onto a patio, hinged patio doors bring nature's beauty inside while enhancing the style of your home. Andersen offers a range of hinged doors in both inswing and outswing configurations. Inswing patio doors save room for smaller exterior areas and are often used in colder climates. Outswing patio doors provide more usable space inside your home and are often used in warm-weather climates.

Unique Locking System for Peace of Mind

Engaging our patented **multi-point locking system** positions two hook bolts above and below the center deadbolt. This tightens the door against the frame to help keep the weather out and secure the door firmly.

Weathertight Performance

One-piece, **continuous weatherstripping** has welded corners to provide maximum protection against air and water infiltration.

Smooth Long-Lasting Operation

For smooth operation and frictionless movement, you can easily change the position of your door panel with our **adjustable hinges**. They also include a **quick-release feature** for easy panel removal during installation.

Premium Hardware

Match the style of your home décor with our **wide selection of hardware styles and finishes** — more than you'll find with just about any other manufacturer. An optional **exterior keyed lock** can also be added to your hardware selection.

For an exact fit for your project.

Consider Expanding Your View

Add a border of sidelights or transom windows to enhance your view.

DID YOU KNOW?

You can easily replace a gliding patio door with a hinged door, giving you the option of having two doors that open.

A-Series Frenchwood® hinged inswing patio door with Encino® hardware in Distressed Nickel

WHY CHOOSE ANDERSEN® OVERSIZED PATIO DOORS?

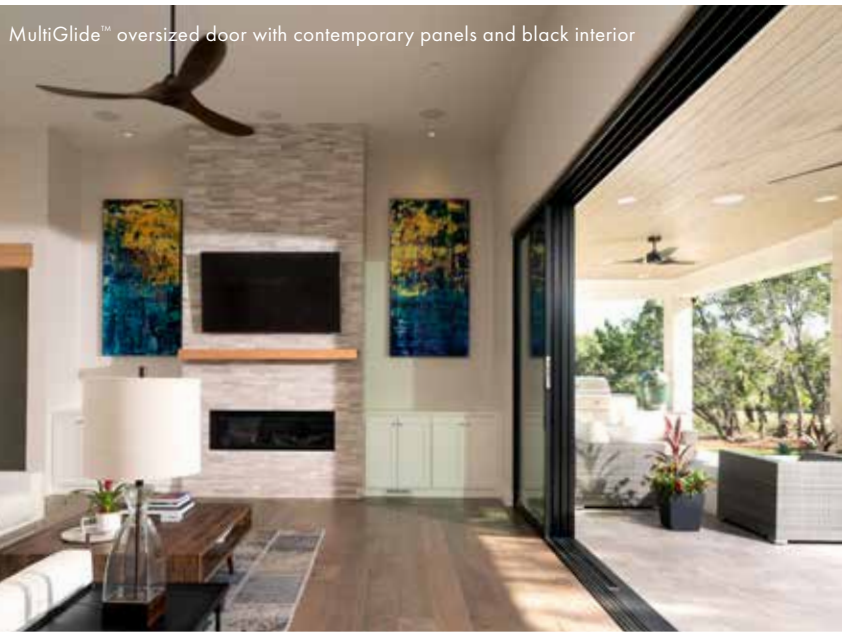

Andersen Oversized Doors give you the creative freedom to design truly spectacular spaces that connect the indoors with the out and bring your vision to life. They're available in MultiGlide™ and Folding configurations with the option of a pass-through window for both.

Folding oversized door with contemporary panels and black exterior

MultiGlide™ oversized door with contemporary panels and black exterior

MultiGlide™ oversized door with contemporary panels and black interior

MULTIGLIDE™ DOOR

BRING THE OUTDOORS IN WITH THE MULTIGLIDE SLIDING GLASS DOOR SYSTEM

- Straight stacking or pocketing for a perfectly unobstructed view
- Contemporary and traditional panel designs
- Sized for openings up to 50 ft. wide and 10 ft. tall with sliding glass panels up to 60 in. wide
- Doors are thermally broken and rated for air, water and structural performance*
- Optional automated open/close system is available in both stacking and pocketing door configurations
- Pass-through window design available

FOLDING DOOR

BRING THE OUTDOORS IN WITH FOLDING GLASS WALLS

- Doors can be built to open from the left, right or center
- Contemporary and traditional panel designs
- Sized for openings up to 48 ft. wide and 10 ft. tall with contemporary panels up to 48 in. wide
- All doors are thermally broken
- Doors can be PG40 for sizes up to 24 ft. wide and 8 ft. tall or PG30 for sizes up to 24 ft. wide and 10 ft. tall** with the on-floor drainage sill option
- Pass-through window design available

Folding oversized door with traditional panels and sandstone exterior

This product available with Stormwatch™ protection, including impact-resistant glass.

* Performance may vary based on unit size and options selected. Verify product performance prior to specifying door.

** Performance rating: Class SP-PG30 size tested 159" x 119.5" for a door with standard sill. Class SP-PG40 size tested 159" x 95.5" for a door with standard sill.

MultiGlide™ pass-through window configuration

PASS-THROUGH WINDOW

BRING THE OUTDOORS IN WITH A SPACE-SAVING DESIGN

- The smaller size of a pass-through window allows you to connect to the outside without needing a full wall of space
- Folding or sliding operation maximizes clear opening
- Contemporary and traditional panel designs
- A flush sill creates a seamless transition between indoors and out
- Meet performance requirements with thermally controlled panels, performance sills or triple-pane glass

COMPARISON CHART
